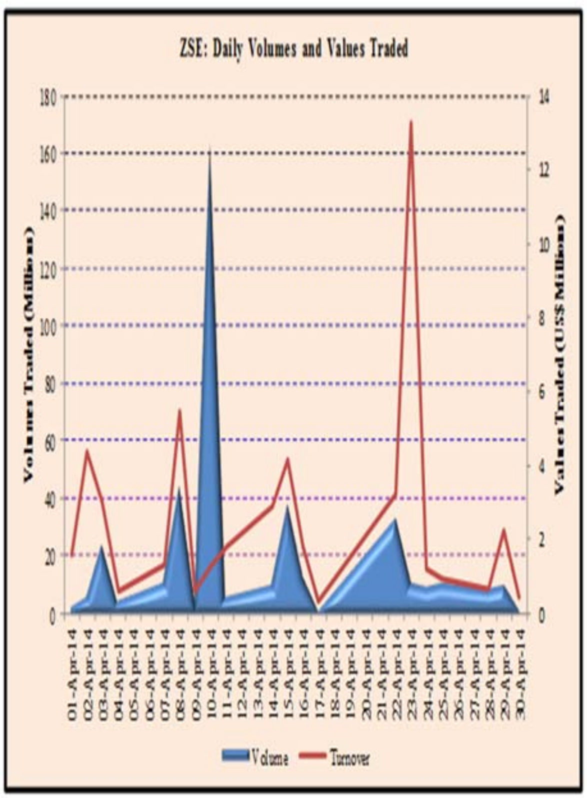
STOCK MARKET DEVELOPMENTS

The geopolitical concerns over the situation in Ukraine and the Federal Reserve's slowdown of its quantitative easing programme, weighed down global stock markets. The favourable first quarter earnings, coupled with some merger activities in the pharmaceutical companies, however, partly reversed the losses.

Amid subdued performance across the board, some African stock markets, however, registered reasonable gains, partly due to the World Bank's recently released 2014 GDP growth forecast of 5.4% for Sub-Saharan Africa, as compared to 4.7% in 2013.



The Zimbabwe Stock Exchange (ZSE), however, was among the African stock markets that registered a loss during the month under review.

The industrial index further declined during the month under review, by 1.93%, to close at 172.91 points, compared to 176.32 points in March. On a year to date basis, the industrial index lost 14.40%.

The mining index, however, recovered marginally, gaining 0.44%, to close at 29.64 points in April 2014, from 29.51 points in March. On a year on year basis, the mining index lost 35.27%.

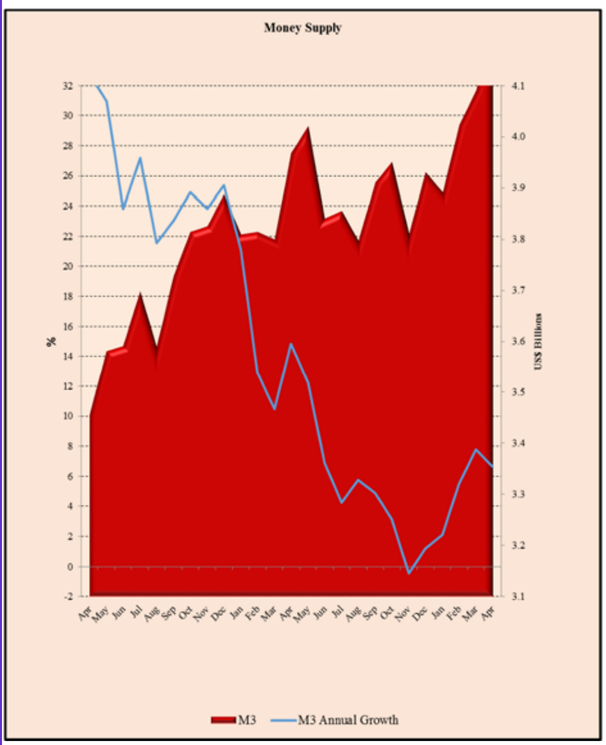
The volume of shares traded, however, rose by 10.57%, from 382.80 million shares in March 2014 to 423.25 million shares in

April 2014. Total turnover, declined by 34.92%, weighed down by trading on small cap counters, to close the month under review at US$51.35 million.

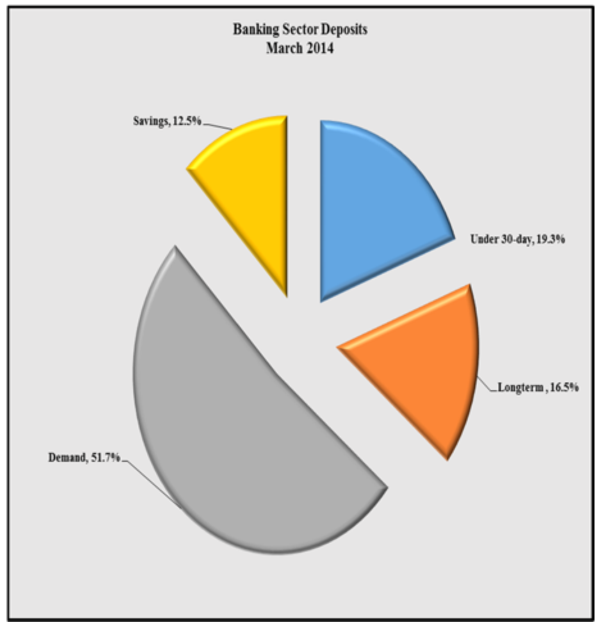
Market capitalization declined by 1.90% to US$4.47 billion, at the end of April 2014, from US$4.56 billion at the close of March 2014.

MONETARY DEVELOPMENTS

Annual broad money growth slowed down by 1.13 percentage points from 7.78% in March 2014 to 6.65% in April. The growth represents a marginal recovery from an average of 1.44% recorded in the last quarter of 2013.



On a month - on -month basis, broad money increased by US$136.5 million (3.33%) in April, compared to US$72.2 million (1.8%) in March. Largely contributing to the growth in money supply, were expansions of US$171.0 million in over 30-day deposits; US$107.2 million in under 30-day deposits; US$100.9 million in demand deposits; and US$92.7 million in savings



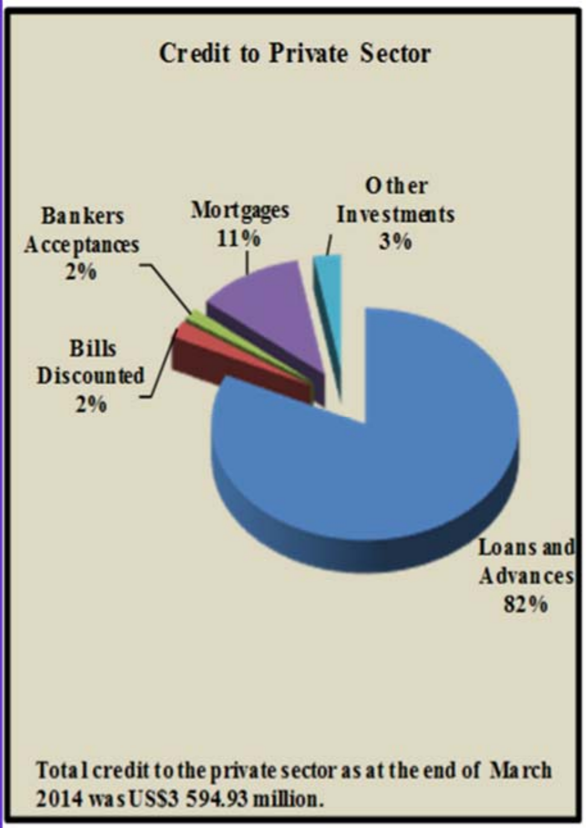
deposits. Partially offsetting these increases was a decline of US$115.4 million in under 30-day deposits.

The growth in money supply continued to be partly driven by tobacco sales. As at end of April 2014, cumulative tobacco sales amounted to over US$330 million, which represents significant inflows into the economy.

Claims on the private sector, increased marginally, from US$3 569.4 million in April 2013 to US$3 594.0 million in April 2014. On a month-on-month basis, credit to the private sector, however, declined by 0.43% in April 2014, from US$3 610.3 million recorded in March 2014.

The slowdown reflects constrained lending by banks on the back of liquidity challenges, as well as risk aversion in the wake of increasing non performing loans.

Outstanding loans and advances were largely in respect of agriculture (19.3%), distribution (18.5%), Households (18.2%), services (16.0%), manufacturing (14.7%), mining (6.6%) and construction (1.6%).



Credit by private sector continues to be short term in nature and mainly utilized for recurrent expenditures, 44.9%; inventory and stocks build up, 34.5%; consumer durables, 13.1%; and capital expenditures, 7.5%.

INFLATION DEVELOPMENTS

Annual Inflation

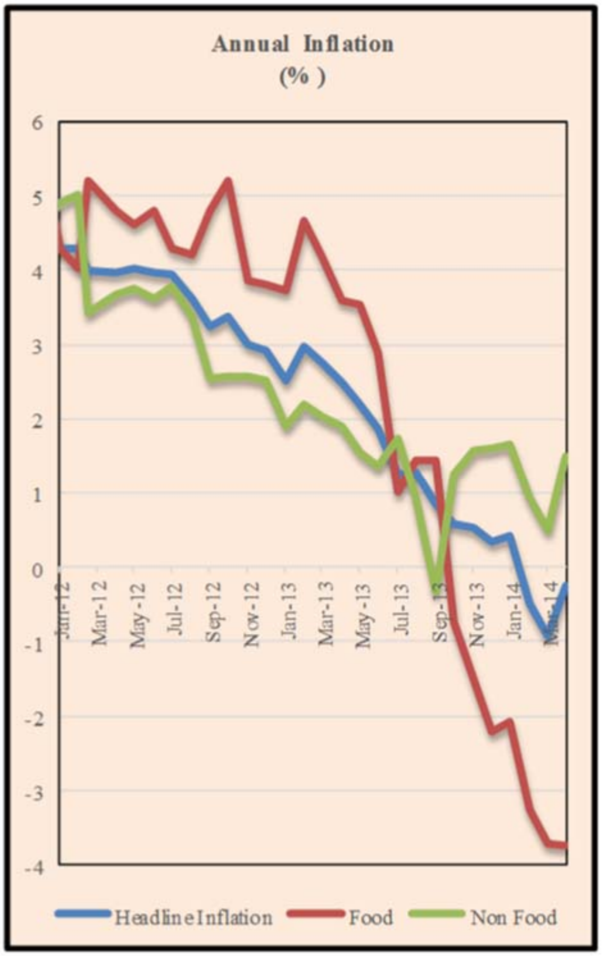
The annual headline inflation, which had been on a downward trend since February 2014, increased to -0.26% in April from -0.91% in March 2014. This followed the increase in non –food inflation.

Annual food inflation remains subdued, declining from -3.71% in March to -3.73% in April 2014, reflecting weak domestic demand. Food prices are expected to remain depressed in the outlook period, as a result of a good harvest in 2014.

The decrease in annual food inflation was largely driven by bread and cereal; vegetables; meat, sugar, jam, honey, chocolate and confectionery; and the fish and sea food sub-categories.

Annual non-food inflation rose from 0.51% in March to 1.50% in April 2014, driven mainly by education; housing, water, electricity, gas and other fuels; alcoholic beverages and tobacco; and health services sub-categories.

The increase in education costs was attributed to increases in pre-primary and primary education, 21.6%; as well as secondary education by 17.1% in April 2014.



Month-on-Month Inflation

Month-on-month inflation gained 0.86 percentage points to 0.58% in April, from -0.22% in March 2014, owing to an increase in monthly non-food inflation.

Monthly non-food inflation stood at 1.09% in April 2014, up from -0.26% in March 2014. The non-food monthly inflation was driven by increases in education; transport; alcoholic beverages and tobacco; and recreation and culture.

Monthly food inflation, however, shed 0.32 percentage points from -0.14% in March 2014, to -0.46% in April 2014, driven by decreases in the prices of bread and cereals; meat; sugar, jam, honey, chocolate and confectionery; and fish and sea food. Increases in vegetables; fruits; and milk, cheese and eggs sub-categories partially offset the decreases in monthly food inflation.

Inflation Outlook

Inflation is expected to remain subdued in the short term, on account of the anticipated decline in food prices during the harvesting period.

NATIONAL PAYMENTS SYSTEM DEVELOPMENTS

Zimbabwe Electronic Transfer Settlement System (ZETSS)

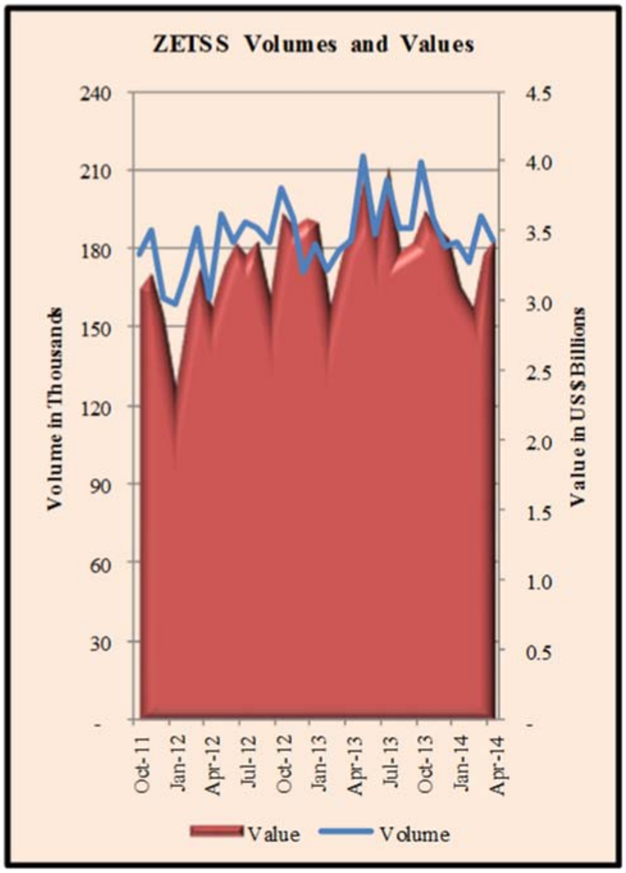
The value of transactions processed through the RTGS system in April 2014 increased by 3% to US$3.4 billion from US$3.3 billion in March 2014 while the volume of transactions registered a decrease of 4%, from 192 020 to 183 626 over the same period.

Card Systems

The total value of card based transactions increased by 12.75% to US$379.42 million in April 2014, from US$336.52 million in March 2014.

Mobile and Internet Based Transactions

The value of mobile and internet based transactions also increased by 5.07%, from US$343.26 million in March 2014 to US$360.67 million in April 2014.



Cheques

The value of cheque transactions, however, decreased to US$9.65 million in April 2014, from US$10.40 million in March 2014.
