INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

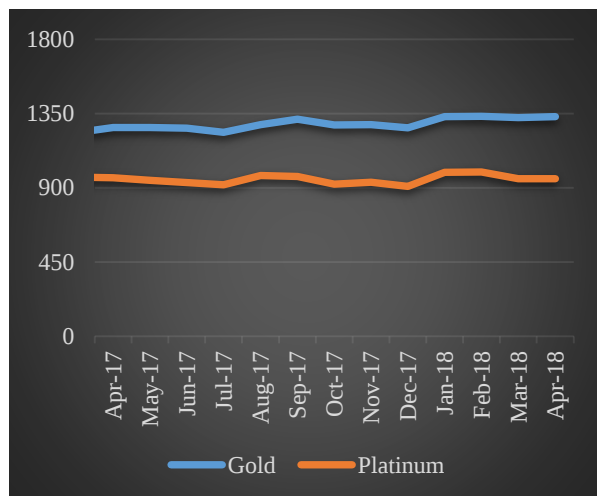

During the month of April 2018, international commodity prices of crude oil, precious and base metals firmed.

Precious Metals

Precious metal prices rose marginally, due to a positive safe haven demand outlook. This was amid escalating geopolitical tensions involving the USA, Syria and Russia.

Gold prices registered a 0.4% increase from US\$1,326.01/oz in March 2018, to US\$1,331.81/oz in April 2018. Platinum prices, also increased by 0.1%, from US\$953.93/oz in March 2018 to US\$955.23/oz in April 2018.

Base Metals

Base metal prices increased during the month under review, partly on account of positive demand prospects in China. This followed strong performance in the Chinese manufacturing industry. Prices were also

boosted by the on-going negotiations between China and the US, aimed at easing trade war tensions.

Consequently, average monthly copper and nickel prices firmed by 0.6% and 4.3%, to close the month under analysis at US\$6,885.40/tonne and US\$13,998.25/tonne, respectively.

Brent Crude Oil

Crude oil prices maintained an upward trajectory, rising by 8% from a monthly average of US\$66.59/barrel in March 2018, to US\$71.90/barrel in April 2018. This was partly attributable to supply disruptions, due to the escalation of geopolitical tensions in the Middle East. In addition, rebalancing efforts by the Organization of Petroleum Exporting Countries (OPEC) also supported the surge in crude oil prices.

MERCHANDISE TRADE DEVELOPMENTS

Total merchandise trade declined by 2.3%, to close the month of April 2018 at US\$873.7 million. This was underpinned by the decline in merchandise imports. Merchandise exports, however, registered a significant increase.

Merchandise Export Developments

Merchandise exports registered a 14.2% increase, from US\$288.6 million in March 2018 to US\$329.6 million in April 2018. This was underpinned by increases in monthly exports of gold, nickel mattes and nickel ores and concentrates. Export earnings from gold, nickel mattes and nickel ores and concentrates increased by 47.1%; 35.6%; and 6.6%, respectively.

Merchandise Import Developments

Total merchandise imports declined by 10.2%, from US\$605.8 million in March 2018 to US\$544.1 million in April 2018. The import bill was largely weighed down by foreign exchange constraints. The country registered significant declines in imports of crude soya bean oil, (-16.2%); petrol, (-15.5%); and diesel, (-7.5%).

- Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- Transferable deposits made up of demand and savings deposits.
- NCDs are also referred to as securities included in broad money.
- All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- Depository corporations made up of the Central Bank and other depository corporations
- Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
- In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrades from claims on government to claims on central bank
- In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
