INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

During the month of March 2019, the international commodity prices of platinum, copper, nickel and Brent crude oil firmed. Gold prices, however, declined.

Precious Metals

Monthly average gold prices retreated by 1.1%, to an average of US\$1,301.59/oz. in March 2019. This was against a backdrop of a stronger US dollar, which weakened the demand for the yellow metal as a safe haven asset. A higher effective US Fed Res funds rate, also weighed down the price of gold, during the month under review. Platinum prices, however, rose by 3.7% to US\$843.07/oz. in March 2019.

Figure 1: Precious metal prices (US\$/oz.)

Base Metals

Prices of base metals continued to register positive trends, as the market reacted positively to reports that the US had postponed a planned tariff increase on Chinese goods. An expected fiscal stimulus in China, coupled with improved

global market sentiment also spurred base metal prices.

Resultantly, copper and nickel increased by 2.3% and 2.8%, to close the month under review at US\$6,434.02/tonne and US\$13,019.04/tonne, respectively.

Brent Crude Oil

Average monthly prices of crude oil increased by 3.5%, to close the month of March 2019 at US\$66.59/barrel. This followed tight global supply conditions mainly driven by production cuts by the Oil and Petroleum Exporting Countries. Prices also increased on account of a further reduction in US shale oil production.

MERCHANDISE TRADE DEVELOPMENTS

Total merchandise trade for March 2019 amounted to US\$894.6 million, a 17.5% decline from US\$921.3 million recorded in the preceeding month. The drop in total merchandise trade was on account of a slowdown in both merchandise exports and imports.

Merchandise Exports

Merchandise exports registered a 15.3% decline, to close the month under review at US\$295.9 million. This was on the back of decreases in exports of nickel mattes; tobacco; diamonds and cane sugar. Gold; nickel ores and concentrates; ferro-chromium; chromium ores and concentrates; and platinum exports, however, increased, during the period under review.

¹ Unwrought platinum excludes other platinum group of metals (PGMs).

Merchandise Imports

Merchandise imports declined by 19.4%, from US\$408 million in February 2019 to US\$329 million in March 2019. In terms of proportions, diesel accounted for 21.2%; unleaded petrol 10%; vaccines, 1.6%; and tractors, 1.3% of total imports. The reduction in imports reflected the impact of import demand management measures being implemented by government, coupled with foreign currency constraints.

Table 2 shows the country's major import commodities for February 2019 and March 2019.

Source: Zimbabwe Stock Exchange, 2019

ZSE market capitalisation stood at \$16.08 billion in March 2019, down from \$19.77 billion

recorded in February 2019. This was largely driven by negative trading on the local bourse.

INFLATION OUTTURN

Annual Inflation

Annual headline inflation rose from 59.40% in February 2019, to 66.8% in March 2019. This was largely attributable to increases in both food and non-food prices.

Annual food inflation surged from 69.84% in February 2019, to 78.55% in March 2019. Similarly, annual non-food inflation accelerated from 54.35% in February 2019, to 61.2% in March 2019.

Figure 14: Annual Inflation (%)

Source: ZIMSTAT, 2019

Monthly Inflation

Month-to-month inflation increased from 1.67% in February 2019 to 4.38% in March 2019, driven by both food and non-food inflation. Monthly food inflation rose by 1.5 percentage

points to 5.1% in March 2019, largely due to increases in vegetable prices. Non-food inflation registered a month-on month growth of 4.05%, from 0.70% in February 2019. The surge in monthly non-food inflation was largely on account of increases in alcoholic beverages and tobacco and transport. Other sub-categories that contributed to the increase in monthly non-food inflation were education; restaurants and hotels; and furniture, household equipment and maintenance. The increases were, however, partially offset by marginal declines in housing, water, electricity, gas and other fuels, health and clothing and footwear.

Notes:

- Depository corporations survey - formerly Monetary Survey.
- Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- Transferable deposits made up of demand and savings deposits.
- NCDs are also referred to as securities included in broad money.
- All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- Depository corporations made up of the Central Bank and other depository corporations
- Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
- In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrades from claims on government to claims on central bank
- In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
- In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money
- All monetary and financial statistics are valued in ZWL\$ since the introduction of the interbank foreign exchange market in February 2019
