INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

The international monthly average prices for platinum, nickel, copper and Brent crude oil increased in December 2020. Gold prices, however, declined in the same month. The global economy was once again hit by resurgent coronavirus cases, which also sent jitters among investors in global markets, as a new variant of the deadly virus emerged. This notwithstanding, robust growth in China, news of the US stimulus package and vaccine roll-outs, buoyed global markets, with expectations of firming economic recovery in 2021.

Precious Metals

Gold

Gold prices declined by 0.5% in December 2020 to US\$1,856.89 per ounce, from US\$1,866.50 per ounce recorded in the previous month. Prices eased for the fourth consecutive month, as investors turned to riskier assets, on the back of the roll-out of coronavirus vaccines. The losses were, however, limited by the yellow metal's safe haven appeal and an unchanged monetary policy stance by the Federal Reserve.

Platinum

Platinum prices breached the US\$1,000.00 per ounce mark in December 2020. The price of the precious metal continued on a positive trajectory, gaining 12.5% month-on-month, from US\$914.05 per ounce recorded in November 2020 to US\$1,027.95 per ounce, during the month under review. Prices were supported by the renewed US stimulus package and greater risk sentiment amongst investors,

which supported industrial demand for the metal. In addition, a projected deficit in the platinum market for 2021, is expected to support prices from the supply side.

Figure 1 shows developments in precious metal prices for the period from December 2019 to December 2020.

Base Metals

Copper

Copper prices continued on a positive trajectory on account of robust economic activity in China, the renewed US stimulus package and investor optimism, as Covid-19 vaccines were rolled out. Resultantly, copper prices firmed by 9.8% to a monthly average of US\$7,756.95 per tonne, from US\$7,063.43 per tonne recorded in the previous month.

Nickel

Nickel prices registered a monthly increase of 6.4%, from US\$15,796.05 per tonne to

US\$16,814.00 per tonne, during the month under review. Prices were supported from the supply-side, as industrial action in New Caledonia and violent protests at a major smelting plant in Indonesia prompted fears of supply disruptions. On the demand side, prices gained support from robust Chinese growth and the renewed stimulus package in the US.

Brent Crude Oil

Brent crude oil prices surged by 14.6% on a monthly basis, from US\$43.98 per barrel in November 2020 to US\$50.41 per barrel in December 2020. This followed the approval of a renewed stimulus package in the US and investor optimism over Covid-19 vaccine approvals and roll-out programmes. These factors renewed optimism over global economic recovery.

MERCHANDISE TRADE DEVELOPMENTS

Total merchandise trade declined by 2.2%, from US\$1,038.2 million in November 2020 to US\$1,015.5 million, during the month under review.

Merchandise Exports

The country's merchandise exports eased by 7.6%, from US\$528.4 million in November to US\$488.3 million in December 2020. Compared to the corresponding month in 2019, the December 2020 outturn was 0.2% lower. The month-on-month decline was largely due to the significant decrease in tobacco exports.

Figure 4 shows developments in the country's merchandise exports for the period from January 2019 to December 2020.

Figure 4: Merchandise Exports (US\$ m)

Notwithstanding the overall decline in exports, exports for commodities such as nickel, gold, diamonds and platinum recorded monthly increases, as shown in Table 1.

Merchandise Imports

Merchandise imports rose by 3.4%, from US\$509.8 million in November to US\$527.2 million in December 2020, maintaining a sustained upward trend since July 2020. Imports for the month under review were also higher than in the corresponding month in 2019, as shown in Figure 6.

Figure 6: Merchandise Imports classified by HS Codes 2019 & 2020 (US\$ m)

Source: ZIMSTAT & RBZ Computations, 2020

The increase in imports in December 2020, was mainly attributable to increases in monthly imports of fertilisers, diesel and electricity. The increase in fuel imports was partly on account of the recovery of oil prices on the global markets.

Table 3 shows imports of major commodities for the months of November and December 2020.

MONETARY DEVELOPMENTS²

Broad money stood at ZW\$204.92 billion³ in December 2020, an increase of 11.16%, from ZW\$184.35 billion recorded in November 2020. The money stock (M3) consisted of foreign currency deposits amounting to ZW\$103.73 billion or 51% of total deposits. Local currency deposits and currency in circulation constituted the balance. Of the local currency deposits, transferrable (or demand) deposits amounted to ZW\$88.66 billion; time deposits, ZW\$9.91 billion; and negotiable certificates of deposits, ZW\$1.44 billion. Notes and coin (currency) in circulation stood at ZW\$1.07 billion, as at end-December 2020.

³ Based on December 2020 provisional balance sheet, pending completion of the audit process.

On an annual basis, the growth in foreign currency deposits partly reflected valuation changes owing to exchange rate changes, from ZW\$16.77 per US\$1 in December 2019 to ZW\$81.79 per US\$1 in December 2020. Local currency deposits registered a growth of 351.02%, due to money multiplier effects in the economy, while currency in circulation increased by 32.01% over the year.

Transitory deposits, consisting of demand and savings deposits continued to dominate the country's money stock, accounting for close to 90% of the deposits in money supply.

Figure 9: Composition of Money Supply

The annual growth in broad money largely reflected a 571.83% increases in credit to the private sector. Net credit to Government remained low due fiscal consolidation measures being pursued by Government.

On a month-on-month basis, net claims on Government increased by 24.09%, largely reflecting holdings of treasury bills, while credit to the private sector rose by 24.09%, to ZW\$74.66 billion as at end-December 2020.

Credit to the private sector was mainly extended towards agriculture, 26.94%; distribution, 14.19%; financial organizations, 13.39%; and households, 13.01%; as shown in Figure 10.

INFLATION OUTTURN

Annual Inflation

Headline inflation which peaked at 837.53% in July 2020, decelerated further from 401.66% in November 2020 to close the year at 348.59%. The rapid disinflation during the second half of the year 2020, was largely attributable to the stability in the foreign exchange market.

Annual food inflation decelerated from 385.02% in November 2020 to 346.40% in December 2020. In the same vein, annual non-food inflation eased from 413.85% to 350.17% over the same period. The declines in both food and non-food inflation culminated in the lowest inflation rate recorded since September 2019.

Food and non-alcoholic beverages contributed 145.43 percentage points to the December inflation rate of 348.59%, a marked increase from the previous month. Bread and cereals and vegetables and meat continued to drive annual food inflation in December 2020.

Non-food inflation contributed about 203.16 percentage points to the December 2020

inflation. Miscellaneous goods and services; housing, water, electricity, gas and other fuels; transport; and alcoholic beverages and tobacco were major contributors to non-food inflation in December 2020. The increase in housing and energy prices was largely attributable to maintenance of dwellings and increases in municipality charges over the year.

Annual Blended CPI inflation⁴ decelerated further, from 214.99% in November 2020 to 188.91%. The non-food component contributed 129.96 percentage points to annual blended inflation, while food and non-alcoholic beverages accounted for the remaining 58.95 percentage points.

Monthly Inflation

Month-on-month ZW\$ inflation accelerated from 3.15% in November 2020 to 4.22% in December 2020. This was largely attributed to increases in prices of food items. Non-food inflation, however, remained unchanged, compared to the previous month.

Month-on-month food inflation rose from 3.91% in November 2020 to 6.54% in December 2020. Fruits, meat and vegetables recorded the largest monthly price increases in December 2020.

The blended monthly inflation accelerated from 2.25% in November 2020 to close the year at 4.25%. This was attributed to price increases in

Notes:

- Depository corporations survey - formerly Monetary Survey.
- Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- Transferable deposits made up of demand and savings deposits.
- NCDs are also referred to as securities included in broad money.
- All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- Depository corporations made up of the Central Bank and other depository corporations
- Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
- In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrades from claims on government to claims on central bank
- In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
- In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money
- All monetary and financial statistics are valued in ZWL\$ since the introduction of the interbank foreign exchange market in February 2019
