INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

International commodity prices for gold, platinum and copper retreated in July 2021. However, nickel and Brent crude oil prices firmed during the same month. Developments in international commodity markets were largely influenced by a strengthening US dollar, and a surge in Covid-19 infections, which continued to pose downside risks on prospects for global economic recovery.

Precious Metals

Gold

Gold prices retreated by 2.2%, from a monthly average of US\$1,846.27 per ounce in June 2021 to US\$1,806.45 per ounce, during the month under review. The price of the yellow metal was heavily weighed down by a stronger US dollar and elevated U.S. Treasury yields. This, together with the Fed's decision to keep interest rates unchanged, dampened the appeal of gold as a safe haven asset. The decline in the price of the yellow metal was, however, moderated by concerns that the rapid spread of the Delta variant of the coronavirus could reduce the pace of global economic recovery.

Platinum

During the month under analysis, platinum prices were subdued on account of a low investment demand outlook for the metal due to a stronger US dollar and higher U.S. Treasury yields. In addition, slackening global demand in the automotive and jewellery industries, amid fears about rising cases of the Delta variant of

Covid-19, weighed down on the price of the metal, which is also widely used in industrial applications. Accordingly, prices declined by 3.9%, from an average of US\$1,131.82 per ounce in June 2021 to US\$1,088.05 per ounce in July 2021. Figure 1 shows the evolution of precious metal prices for the period from January 2020 to July 2021.

Base Metals

Copper

Copper prices remained subdued, amid fears of tepid demand in China, following signs of slowing economic recovery in the economy of the Asian giant. China is also the world's biggest consumer of base metals. Prices declined by 2.4%, to a monthly average of US\$9,433.59 per tonne, from US\$9,667.28 per tonne recorded in the previous month.

Nickel

Nickel prices continued on an upward trajectory, supported by supply concerns, following Russia's announcement of possible export taxes and Indonesia's plan to restrict investment in nickel pig iron and Ferro-nickel smelters. Furthermore, the increase in demand in spot markets, particularly from alloy makers, also bolstered prices. Reflecting these developments, prices gained by 5.2%, from a monthly average of US\$17,883.38 per tonne in June 2021, to close the month under analysis at an average of US\$18,817.05 per tonne.

Brent Crude Oil

Brent crude oil prices increased by 1.2% to a monthly average of US\$74.07 per barrel in July 2021. Prices firmed as crude stockpiles in the US, the world's top oil consumer, fell to their lowest levels since January 2020. Global

demand for oil was also holding up, in spite of increasing Delta variant infection cases.

INFLATION OUTTURN

Annual Inflation

Annual inflation declined sharply, from 106.64% in June 2021 to 56.37% in July 2021.

Notes:

- Depository corporations survey - formerly Monetary Survey.
- Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- Transferable deposits made up of demand and savings deposits.
- NCDs are also referred to as securities included in broad money.
- All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- Depository corporations made up of the Central Bank and other depository corporations
- Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
- In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrades from claims on government to claims on central bank
- In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
- In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money
- All monetary and financial statistics are valued in ZWL\$ since the introduction of the interbank foreign exchange market in February 2019
