INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

International commodity prices for gold, platinum and nickel declined during the month of March 2021. Crude oil and copper prices, however, firmed during the same month. A stronger US dollar, coupled with prospects of global economic recovery, amid optimism stemming from the global vaccine rollout, in large part, influenced international commodity price developments.

Precious Metals

Gold

Gold prices extended losses during the month under review, weighed down by a strengthening US dollar and elevated US treasury yields, a development which eroded the yellow metal's investment appeal. The expectation that the pace of Covid-19 vaccine rollouts would influence a global economic recovery, persuaded investors to shift from the traditional safe haven asset to other interest-bearing assets. Resultantly, the monthly average price of gold declined by 5.1%, from US$1,811.58 per ounce in February 2021 to US$1,719.89 per ounce, during the month under analysis

Platinum

Platinum price eased by 2.1%, from a monthly average of US$1,206.10 per ounce in February 2021 to US$1,206.10 per ounce, during the month under review. The decline in prices was also attributed to a stronger US dollar and surging bond yields, which curbed the investment demand prospects of the metal.

Figure 1 shows the movements in precious metal prices for the period from March 2020 to March 2021.

Base Metals

Copper

Copper prices continued on an upward trajectory, on account of a bright demand outlook and supply disruptions in some source markets. Reports from China, the top consumer of the base metal, showed stronger-than-expected industrial growth in the first two months of 2021. The red metal also got support from prospects of strong demand from the Eurozone, as economic activity in the bloc rebounded in March 2021. Resultantly, prices rose by 6.6% to a monthly average of US$9,004.98 per tonne, from US$8,445.23 per tonne recorded in February 2021.

Nickel

Nickel prices slumped during the month of March 2021, after a major deal by Chinese firm

Tsingshan Holdings Group eased worries of battery-grade nickel supply shortages. The Chinese firm signed agreements to offer battery-grade, which is used to make batteries for electric vehicles, thereby, easing worries of shortages. Reflecting this development, prices declined by 11.3%, to close the month under review at an average of US$16,460.74 per tonne.

Brent Crude Oil

Brent crude oil prices remained bullish during the month under analysis, owing to tight global supply conditions as the Organization of Petroleum Exporting Countries (OPEC), extended production cuts. In addition, expectations of recovery in oil demand due to Covid-19 vaccinations also boosted prices. Against this backdrop, prices rose to an average of US$65.63 per barrel, which was 5.1% higher than the US$62.46 per barrel recorded in the previous month.

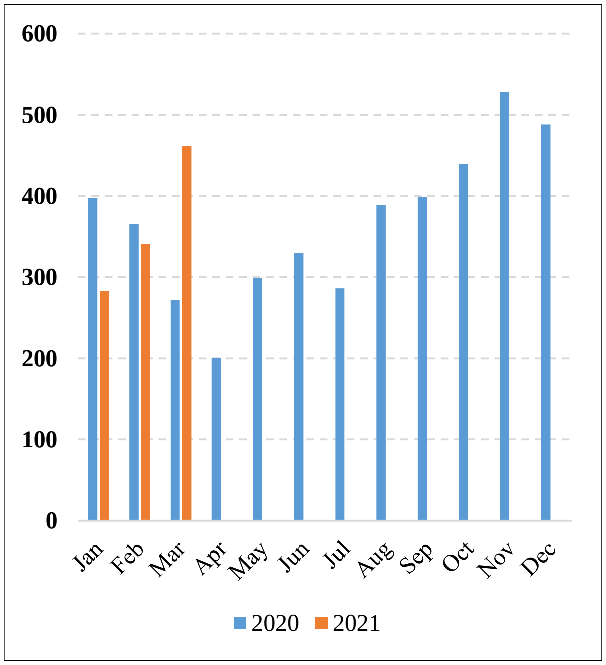
MERCHANDISE TRADE DEVELOPMENTS

The country's total merchandise trade rose by 24.8%, from US$792.8 million in February 2021 to US$989.0 million in March 2021. The monthly decline in total merchandise trade was on account of the slump in both merchandise exports and imports during the month under review. Relative to the comparable month in 2020, total merchandise trade was 37.0% higher.

Merchandise Exports

The country's merchandise exports stood at US$461.8 million in March 2021, representing a 35.5% increase over the previous month's outturn of US$340.8 million. On a year- on -year basis, merchandise exports were 69.7% higher than the US$272.1 million recorded in the corresponding month in 2020. In 2020, trade was largely affected by the Covid-19 induced lockdown measures imposed by the country and its major trading partners to curb the spread of the virus. Developments in the country's monthly merchandise exports for 2020 and the first three months of 2021,are shown in Figure 4.

Figure 4: Merchandise Exports (US$ m)



Source: ZIMSTAT, 2021

The marked rise in monthly exports was largely on account of increases in exports of PGMs (67.5%), Ferro-chrome (26.0%) and industrial diamonds (25%). Nickel particularly benefited from its robust global demand from the electrical vehicle market, where it is used as a major ingredient in the manufacturing of electric vehicle batteries. Gold exports slightly eased during the month, amid subdued prices on the international market, as investors shifted to riskier assets at the expense of traditional safe haven assets such as bullion. Table 1 shows developments in the country's exports for the months of February and March 2021.

Merchandise Imports

Merchandise imports increased by 16.6%, from US$451.9 million in February 2021 to US$527.2 million in March 2021. The increase in the country's imports was partly reflective of a relatively stable local currency. Likewise, imports for the current month were also higher than in the corresponding month in 2020, as shown in Figure 6.

Imports of diesel; vaccines; crude soya bean oil; and electricity recorded increases, during the month of March 2021, as shown in Table 2. The surge in imports of Covid-19 vaccines followed vaccine roll-outs, as the country ramped up its programme to get the lethal respiratory disease under control.

Merchandise Trade Balance

The country's trade balance significantly improved from a deficit of US$111.1 million in February 2020, to a deficit of US$65.4 million in March 2021. This was on account of higher export earnings relative to imports. Figure 8 shows the country's trade balance for the period from March 2020 to March 2021.

The increase partly reflected valuation changes owing to the movement in the exchange rate, from ZW$28.1 per US$1 in March 2020 to ZW$84.40 per US$1 in March 2021.

On an annual basis, local currency deposits registered a growth of 330.74%, while currency in circulation increased by 62.13%.

Figure 9: Composition of Money Supply

[2]All monetary numbers valued in ZW$ since the adoption of an interbank market determined exchange rate in February 2019.

INFLATION OUTTURN

Annual Inflation

Headline inflation continued on a downward trend, shedding 81.04 percentage points on the February 2021 rate of 321.59% to 240.55% in March 2021.

Inflation has maintained a downward trend since August 2020, following the introduction of the foreign exchange auction trading system in June 2020. The foreign exchange auction system stabilised the foreign exchange market.

Declines in both food and non-food inflation saw the annual inflation rate falling, reaching its lowest level since July 2019. Annual food inflation eased by 59.15 percentage points, from 358.96% in February 2021 to 299.81% in March 2021. Non-food inflation also decelerated from 297.07% in February 2021 to 206.00%, in the month under analysis.

In the food category, vegetables; bread and cereals, and meat, continued to be the major drivers of annual food inflation in March 2021. The largest contribution to annual non-food inflation was from miscellaneous goods and services; transport, alcoholic beverages and tobacco, housing, water, electricity, gas and other fuels.

Annual blended CPI inflation[3] slowed down, from 162.95% in February 2021 to 122.33% in March 2021.

Monthly Inflation

Monthly ZW$ inflation decelerated from 3.45% in February 2021, to 2.26% in March 2021, driven by declines in both food and non-food inflation.

Monthly food inflation eased from 4.42% in the previous month to 2.52% in March 2021, largely

on account of declines in bread and cereals sub category and vegetables.

Monthly non-food inflation also slowed down, from 2.73% in February 2021 to 2.06% in March 2021. The fall was due to declines in all non-food CPI sub-categories.

The blended month-on-month inflation rate rose from 0.71% in February 2021 to 1.09% in March 2021, as shown in Figure 13.

Notes:

(i) Depository corporations survey - formerly Monetary Survey.

(ii) Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.

(iii) Transferable deposits made up of demand and savings deposits.

(iv) NCDs are also referred to as securities included in broad money.

(v) All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.

(vi) Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)

(vii) Depository corporations made up of the Central Bank and other depository corporations

(viii) Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.

(ix) In December 2017, the statistics were adjusted in restrospect by reclassifying Securities issued under Aftrades from claims on government to claims on central bank

(x) In December 2017, the statistics were adjusted in restrospect by reclassifying amounts accessed by banks under the Aftrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank

(xi) In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money

(xii) All monetary and financial statistics are valued in ZWL$ since the introduction of the interbank foreign exchange market in February 2019
