INTERNATIONAL COMMODITY PRICE DEVELOPMENTS

In January 2022, global monthly average prices for gold, platinum, copper, nickel, and crude oil firmed, compared to the preceding month. Commodity markets were largely influenced by a weaker US dollar, coupled with risks emanating from escalating geopolitical tensions between Russia and Ukraine and the West.

Precious Metals

Gold

Gold prices rose by 1.5%, from a monthly average of US\$1,790.63 per ounce in December 2021 to US\$1,816.92 per ounce, during the month under review. The price increase was underpinned by a weaker US dollar and growing investor concerns over rising US inflation. The prevailing market conditions prompted investors to shift to the yellow metal as a safe-haven asset. Geopolitical tensions surrounding the threats by Russia to invade Ukraine, magnified the appeal of the yellow metal as a safe-haven asset. The gains were, however, capped by investor expectations that the US Federal Reserve Bank would soon tighten its monetary stance.

Platinum

Platinum prices rose by 5.0% to US\$993.50 per ounce in January 2022, from a monthly average of US\$946.39 per ounce in the previous month. The rally in prices was mainly driven by a weaker US dollar and prospects of global economic recovery, amid easing concerns over

the omicron coronavirus variant. In addition, prices were supported by fears of tight supplies, owing to escalating geopolitical tensions between Russia and Ukraine. Russia is one of the world's major platinum producers. Figure 1 shows the evolution in precious metal prices for the period from January 2021 to January 2022.

Figure 1: Precious Metal Prices (US\$/oz.)

Base Metals

Copper

Copper prices rose during the month of January 2022, on concerns of dwindling inventories and worries over supply side bottlenecks in some key source markets. The red metal also benefited from increasing demand, in tandem with the global economic recovery. Prices rose by 2.7%, from a monthly average US\$9,530.48 per tonne recorded in the preceding month to US\$9,785.67 per tonne, during the month under analysis.

Nickel

Nickel prices remained bullish, supported by signs of tight supplies of the base metal, as demand from stainless steel producers and battery manufacturers grew tremendously. Prices rose by 11.5%, to close the month under review at an average of US\$22,193.62 per tonne, from US\$19,911.86 per tonne in the previous month. Figure 2 shows developments in base metal prices for the period from January 2021 to January 2021.

Figure 2: Base Metal Prices (US\$/ton)

Source: Bloomberg, 2021

Brent Crude Oil

Brent crude oil prices rebounded, gaining by 14.8%, from a monthly average of US\$74.53 per barrel in December 2021 to US\$85.56 per barrel, during the month under review. Prices

rose on the back of an already tight global oil supply situation, exacerbated by disruptions caused by threats by Russia to invade Ukraine. Notably, Russia is a crucial transit hub for crude oil to the European Union regional bloc. The developments in crude oil prices, for the period from January 2021 to January 2022, are as shown in Figure 3.

MONETARY DEVELOPMENTS¹

Broad money declined by 1.03% to ZW\$470.44 billion in January 2022, from ZW\$475.36 billion recorded in December 2021. The decrease in money supply was attributable to a fall in foreign currency

¹All monetary numbers valued in ZW\$ since the adoption of an interbank market determined exchange rate in February 2019.

deposits, as companies utilized their balances to meet foreign payments obligations. The money stock was composed of 56.73% in local currency deposits and 42.02% in foreign currency deposits. Currency in circulation constituted the remainder of 0.47%. Figure 4 shows the composition of money supply.

Figure 4: Composition of Money Supply

Source: Reserve Bank of Zimbabwe, 2021

The month-on-month decline in broad money, largely reflected the ZW\$13.02 billion fall in foreign currency deposits. Partially offsetting the decline, was an increase of ZW\$8.10 billion in the local currency component of money supply.

During the month under review, net domestic claims declined by 2.17%, to ZW\$332.29 billion. The decrease was largely due to a decline of ZW\$23.83 billion in net claims on Government, reflecting an increase of ZW\$21.99 billion in Government deposits.

On an annual basis, broad money registered a growth of 113.37%, down from 507.86% recorded in January 2021. The local currency component of broad money grew by 143.77%;

while foreign currency deposits increased by 82.04%.

The growth in foreign currency deposits from ZW\$108.59 billion in January 2021 to ZW\$197.68 billion in January 2022, was largely due to an increase in the value of foreign currency accounts (FCA) deposits, from US\$1.31 billion in January 2021 to US\$1.71 billion in January 2022. Revaluation due to exchange rate movements also contributed to the increase in the local currency equivalent of the FCA deposits.

The annual growth in broad money was largely due to increases of 190.54% and 282.18% in credit to the private sector and net claims on Government, respectively. RBZ credit to Government, however, reflected the accounting entry for the local currency equivalent of the country's drawdowns on the IMF's Special Drawing Rights (SDRs). Banking sector credit to Government was mainly in the form of Treasury bill holdings by banks.

Credit to the private sector mainly benefited the agriculture and household sectors, which received 29.33% and 23.87% of the total credit, respectively. The distribution and manufacturing sectors also received 13.40% and 11.64%, respectively. Credit shares for the rest of the economic sectors are shown in Figure 5.

Figure 5: Distribution of Private Sector Credit

Source: Reserve Bank of Zimbabwe, 2021

Credit to the private sector was largely channeled towards inventory build-up, 34.39%; other recurrent expenditures, 25.93%; and fixed capital investments, 17.86%.

STOCK MARKET DEVELOPMENTS

During the month of January 2022, the Zimbabwe Stock Exchange (ZSE) was characterized by bullish sentiments for the second consecutive month. As a result, all major indices registered gains.

The All Share, Top 10 and Medium Cap indices added 11.62%, 14.77% and 4.05% to close at 12 079.74 points, 7 817.52 points and 21 233.64 points, respectively. The resources index gained by 4.88% to close at 8 196.79 points.

Figure 6: Zimbabwe Stock Exchange All Share and Top 10 Indices

Source: Zimbabwe Stock Exchange, 2021

The cumulative volume and value of shares traded on the ZSE declined by 63.89% and 78.93% to 82.40 million shares and ZW\$3.70 billion, respectively.

The proportion of foreign purchases to the value of shares traded declined to 1.42%, compared to 3.92% recorded in December 2021. Concomitantly, the net foreign position worsened to an outflow ZW\$203.49 million, from a net inflow of ZW\$332.00 million recorded during the previous month.

Figure 7: ZSE Monthly Volumes and Values Traded

Source: Zimbabwe Stock Exchange, 2021

Owing to positive trading, during the month under analysis, the local bourse gained ZW\$27.14 billion, or 2.10% worth of capitalization to close at ZW\$1.32 trillion.

INFLATION OUTTURN

Annual Inflation

Annual headline inflation declined by 0.13 percentage points, from 60.74% in December 2021 to 60.61% in January 2022. This followed a fall in annual food inflation, which more than offset the increase in non-food inflation.

Annual food inflation eased from 64.91% in December 2021 to 63.31% in January 2022. Year-on-year non-food inflation, however, rose

from 57.74% in December 2021 to 58.59% in January 2022.

Annual blended inflation² fell from 24.92% in December 2021 to 24.88% in January 2022, with the food and non-food components registering marginal declines.

Monthly Inflation

The ZW\$ monthly inflation eased from 5.76% in December 2021 to 5.34% in January 2022, following a decline in monthly non-food inflation, against the rise in food inflation.

Monthly non-food inflation fell from 5.41% in December 2021 to 4.25% in January 2022. Miscellaneous goods and services; housing, water, electricity, gas, and other fuels; and transport had the largest impact on monthly non-food inflation.

Food inflation rose marginally, from 6.22% in December 2021 to 6.79% in January 2022. This was, in large part, due to increases in bread and cereals; meat; and vegetable prices. Figure 8 shows the month-on-month inflation profile.

²The Zimbabwe National Statistical Agency (ZIMSTAT) commenced publication of the blended CPI inflation in June 2020. The blended CPI inflation combines the average changes

in price of goods and services sold in the two main currencies in circulation, namely the ZW\$ and the US\$.

Figure 8: Month-on-Month Inflation (%)

Source: ZIMSTAT, 2021

Monthly blended inflation increased from 2.06% in December 2021 to 2.73% in January 2022.

NATIONAL PAYMENTS SYSTEM

The value of transactions processed through the National Payments System (NPS) declined by 2.17% to ZW\$1.14 trillion in January 2022. NPS transaction volumes stood at 102.44 million in January 2022, down from 130.77 million in December 2021.

Zimbabwe Electronic Transfer Settlement System (ZETSS)

The month of January 2022 saw Real Time Gross Settlement System (RTGS) transactions rise by 16.94% to ZW\$802.68 billion, from \$747.04 billion in December 2021. RTGS transaction volumes, however, declined to 0.95 million in January 2022, from 1.12 million in the preceding month.

Figure 9: ZETSS Volumes and Values

Source: Reserve Bank of Zimbabwe, 2021

Cash Transactions

During the month under review, cash-based transactions fell by 32.03%, from ZW\$23.60 billion in the preceding month to ZW\$16.04 billion.

Mobile and Internet Based Transactions

Mobile and internet-based transactions stood at ZW\$272.00 billion, during the month under review, down from ZW\$315.43 billion in December 2021.

Card Based Transactions

Card-based transactions declined by 15.94%, from ZW\$72.61 billion in the previous month to ZW\$61.04 billion in January 2022.

Notes:

- Depository corporations survey - formerly Monetary Survey.
- Broad money redefined using IMF's Monetary and Financial Statistics Manual of 2000. Major changes include exclusion of Government deposits held by banks from broad money.
- Transferable deposits made up of demand and savings deposits.
- NCDs are also referred to as securities included in broad money.
- All classes of time deposits, short and long term are classified as time deposits, which are also termed other deposits.
- Credit to the private sector now excludes claims on other financial corporations, as well as claims on state and local government (local authorities)
- Depository corporations made up of the Central Bank and other depository corporations
- Other depository corporations (ODCs) - Commercial banks, merchant banks, building societies and POSB.
- In December 2017, the statistics were adjusted in retrospect by reclassifying Securities issued under Afrades from claims on government to claims on central bank
- In December 2017, the statistics were adjusted in retrospect by reclassifying amounts accessed by banks under the Afrades from liabilities to Other Depository corporations and Other Financial Corporations to liabilities to Central Bank
- In December 2018, statistics were revised from November 2017 due to reclassification of lines of credit (foreign liabilities) that were initially classified as deposits included in broad money
- All monetary and financial statistics are valued in ZWL\$ since the introduction of the interbank foreign exchange market in February 2019
